

PROJECT OVERVIEW

Create an application using supplied assets to enable i2i to collect results of a consumer survey, to operate on 43" touch screens, supply the 43" touch screens in a bespoke 'A' frame to include a flight case for transporting around the UK.

OUR SOLUTION

Freetail produced a web app giving i2i the facility to collect the consumer survey data and then easily download by way of a wireless connection to the master 'A' frames Mini PC. The 'A' frames were designed to fit in with i2i's clients brand and theme for the roadshow.

SCOPE OF WORKS

- ✓ Concept design & development
- ✓ Manufacture
- ✓ Installation
- ✓ App Creation
- ✓ Training
- ✓ Data Collection
- ✓ Reporting
